## Spill Pallet|Poly Spill Pallet(2 Drum)

The poly spill pallet is actually a spill-proof plastic pallet with sump and forklift groove. It can be used for storing, handling and transferring oil drums and chemical drums. All liquid leaking out will flow into the sump rather than the ground. With the supporting ramp, chemical drums can be handled easily and quickly. The high-strength mobile and removable grate is easy to remove, clean and replace. Liquid in the sump can be discharged through the leakage holes, and most of liquid can be recycled.

## Chemical Spill Prevention and Control

- Thicker side border and central load-bearing structure is very strong, which can firmly carry fully- loaded oil drums, chemical barrels and other storage containers and equipment.
- Polyethylene material, anti-UV, anti-rust, anti-corrosion, suitable for most chemicals.
- Orange anti-skid gratings, it will not rupture at full load, and the gratings are removable, easy for rapid treatment of liquid spill.
- The tray can use forklift, platform can spill by leaking into sheng workstation.
- Help to keeping the floor dry to avoid slip and fall
- All sheng drip tray and platforms can be nested stack , ensure orderly storage and leakage prevention of oil drums and chemical barrels
- In line with the regulations of EPA 40 CFR 264.175 of the U.S. Environmental Protection Agency (EPA) and the regulations of Spill Prevention and Control Act (SPCC) as well as U.S. NPDES.
